ADITY UPADHYAY

DATA ANALYST

Mathura, UP 281301 ♦ 9711296105 ♦ adityaupadhyay2590@gmail.com

PROFESSIONAL SUMMARY

Detail-oriented Data Analyst and Computer Science student proficient in **Python, SQL, and AI-driven data workflows**. Strong foundation in data manipulation, visualization, and building interactive web interfaces to communicate analytical insights. Adept at leveraging machine learning frameworks, prompt engineering, and database management to optimize workflows, solve complex business problems, and support data-driven decision-making.

Experience

Interactive Data Visualization & Animation Engine | *Python, JavaScript, HTML5 Canvas*

- **Designed and built an interactive web-based dynamic rendering engine using Canvas and physics-based simulations.**
- **Optimized real-time data frame rendering and state management, improving rendering performance and visual feedback.**

Operations & Inventory Analyst (Volunteer) | *Family Business — Mathura, India*

01/2025 – 05/2025

- Re-engineered inventory tracking procedures using structured logging, significantly reducing stock discrepancies and improving operational workflow.
- Analyzed customer engagement and sales trend data to support local marketing strategies, increasing community reach.
- Managed daily operational logistics, translating physical sales patterns into actionable stocking schedules.

.

Education

Bachelor of Computer Applications: Computer Programming *(Expected in 04/2027)*

Dr. Bhimrao Ambedkar University Agra – *Agra, India*

Skills & abilities

 Data Analytics & Visualization: Python (Pandas, NumPy, Matplotlib), SQL (MySQL/PostgreSQL), Data Wrangling, Exploratory Data Analysis (EDA)

 Programming & Web Technologies: Python, C++, PHP, HTML5 Canvas, Tailwind CSS

 AI & Prompt Engineering: Prompt Optimization, LLM Integration, Machine Learning Fundamentals

 Developer Tools: Git, GitHub, REST APIs, VS Code
